This *Feather in my cap* award is given to

Joydeep Das

for his all around contribution in the SAS RAID Host Software Testing Project. He mentored the team with his domain expertise in RAID Controller Testing and equipped the team with the necessary skill-set. He also significantly contributed towards Test Plans and Test Case development for the API, CLI & SMIS Testing. His contribution towards Phase 1 test execution with the help of a team, of relatively less experience, is an inspiring feat of achievement. With this award the Team thanks him for all his valuable contributions!.
